## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 – 11 are allowed.

The following is an examiner's statement of reasons for allowance:

Sorrells et al. shows a network for production of first and second output signals (I, Q) at respective first and second loads (R34, R35 – Fig. 29) including parallel paths (2598, 2501, 2503, 2505 – Fig. 25), first and second loads (R34, R35 – Fig. 29) and a compensation circuit (9200 – Fig. 92B), where the parallel paths comprise a source with one end connected to ground (V19 – V21 – Fig. 29), but does not show the second end of the first source is connected to a trimming resistance, the second end of the second source connected to a trimming capacitance and the second end of the third source connected to the compensation unit where sources (V19 – V21 – Fig. 29) are connected to ground on one end and a mixer at the other end.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sorrells et al. – shows a network comprising DC offset and I/Q functions.

Heinen – shows a receiver circuit for FM digital signals.

Hellmark – shows receiver compensation in a duplex transceiver.

Soderkvist – shows compensation for electrical signals.
